

# Stoichiometry Review

Target: Today I will be able to use mole ratio to determine a quantity of an unknown substance from a quantity of a known substance.

**Pg. 127**

# Test Friday, 2/14

- Have your notebook complete on Friday, turn in before class.
- This includes an updated study log.
- On-task behavior, good lab safety, and respectful discourse can earn you a notecard this week.

# Review Questions from Quiz

- Pg. 127

## Quickwrite, **pg. 126**

- What specifically do I need to improve on to perform well on this Friday's test? (*In class behavior? Keep up with homework? Seek help from teacher?*)

# Review Topics

- **Pg. 126**

# Study Plan

- On your **study log**, list the topics **YOU** need to review. Pg.
- Write the amount of time you will spend on these topics. (I suggest you spend 3 hours minimum studying this week for the test Friday).
- Fill in the exact time spent in the Date and Time Box as you go.
- **This is you homework for this week. It will be graded.**

# Lab Tomorrow

- Wear closed-toed shoes, have hair tied back, and wear clothing you wouldn't mind getting dirty. No scarves or loose jewelry.
- Annotations and MSDS must be completed prior to starting the lab.

# Lab Annotations

- MSDS on **pg. 128**
