

NHS Science Survival Fund

Dear Parents/Guardians,

We are so excited to be able to share this year in science with your students. The Science Department works very hard to integrate the latest technology in our curriculum. In the past few years, with the help of the NHS Science Survival Fund and the PTSA, we have been able to purchase new microscopes, digital laboratory balances, hot plates, glassware and new computer equipment. This fund has also allowed us to run laboratory experiments that engage and motivate our students to pursue further education in Science related fields.

In order to maintain the high quality of laboratory related activities at Novato High School, the Science Department is requesting a donation of between \$15.00 and \$30.00 per student. All funds generated will apply directly to the purchase of laboratory related supplies as well as the repair of equipment. We understand that some people may not be able to contribute and others may be able to contribute much more. We greatly appreciate your support in helping us keep Novato High School science one of the best science departments in Marin County

Regards,

Novato High School Science Department

Student Name: _____

Parent/Guardian Name: _____

Parent/Guardian Signature: _____

Yes, I would like to contribute: ☐ \$15.00
 ☐ \$30.00
 ☐ Other _____

No, I do not wish to contribute at this time: ☐

(Please make checks out to: *NHS Science*)
